COMPANY OVERVIEW

Orca Intelligence, an 8(a), EDWOSB, was founded in 2014, to decrease the time it takes to elicit, analyze, and manage software and system requirements. We deploy our certified experts on Agile project to with our AI solution to establish a comprehensive and sustainable requirements framework titled Plan, Analyze, Manage (P.A.M.) that can be utilized across multiple projects ensuring long-term success.

DIFFERENTIATORS

Our Proprietary tool **Swiftly™**, uses the power of Artificial Intelligence to generate detailed requirements.

In minutes, **Swiftly** predicts the following:

- Epics
- Features
- User stories
- Data Elements
- Tasks
- Users
- Validation messages
- Relate user stories
- Wireframes
- Export file

Swiftly seamlessly associates

- User Role Matrix
- Related user story
- Traceability Matrix
- Analysis Matrix
- NIST 800.171 Requirements
- Electronic Code of Federal Regulations (eCFR)
- State, Local and Corporate Regulations

Certified Product Experts in Product Management, Business Analysis and Agile Certifications

OUR SERVICES

Agile Project Management

- Key Objectives and Results Definition
- Release Planning and Sprint Planning
- Agile Framework Set-up and Configuration

Systems Analysis & Design

- Facilitate requirements discovery sessions using an accelerated process.
- Analyze and manage business systems requirements.

Human Centered-Design Engineering (HCDE)

- User Research with Design Thinking
- Usability Testing with Design Sprints

Solutions Architecture

- Proof of concept research and prototyping
- Vendor Analysis and Evaluation
- Technology framework and infrastructure definition

PAST PERFORMANCE

District of Columbia Office of Employment Services

Problem: Office of Apprenticeship Information and Training and Youth Programs System Modernizations

Solution: Autogenerate requirements for solicitations and develop efforts

Outcome: Decreased the time to clearly define requirements and identify solution architecture by 45%.

Children's National and Georgetown Medstar

Problem: Desired dashboard to centralize the social and emotional data for pre-k3.

Solution: Use Power BI to aggregate data across education centers.

Outcome: Design and developed a dashboard prototype within scope and budget.
